

DATE: June 25, 2021
MEMO TO: Mapleton Sewer District Customers
FROM: Gilles St. Pierre, Superintendent
SUBJECT: Upcoming Income Survey to Assist in Obtaining Grant Funding

The Mapleton Sewer District is working with RCAP Solutions in order to conduct an income survey to help determine the eligibility for potential grants and loans to complete improvements to the District's sewer system. The District has completed an evaluation of the sewer system and there are areas that have excessive infiltration and stormwater induced inflow which should be upgraded to reduce the impact of these flows on the wastewater treatment plant. Reducing flows at the plant is necessary to optimize the ability to treat residential flows and commercial flows from the community.

The District has been attempting to find an acceptable funding package to complete sewer system improvements but due to the overall income in the community, we have not been able to qualify for any grant. The impact of conducting this work without grant would be significant to the small number of sewer users which is why we are requesting that each customer that receives the income survey from RCAP please take the time to fill out the survey and return it in the self-addressed envelope.

These survey's will be handled by RCAP in a confidential manner and will be processed by them, not by members of the District. You should see the survey in the next few weeks.
