

# Girl on Top Rear Entry

A lot of couples like rear entry positions. This is a great position for the husband to go deeper inside of the wife. The issue with this position can be the depth, because it can cause discomfort if he goes too deep.

To get better control with rear entry you can try the girl on top method.

The husband sit on the bed or in a chair that will provide a comfortable height for the wife to squat. Tell him to lean back and hold himself up with his hands. Ask him to spread his legs so that you have somewhere to stand.

Now ladies...listen up...actual sexy sex is not how you see it on the movies. When you are actually having sex, you're going to have to grab his penis and guide it into you. It's not just going to end up in there on its own...I don't care what Hollywood says.

Here is where you are going to have to do a lot of guidance. You need to squat down like you are going to sit on your man's lap. Then you will have to guide him into your vagina.

Once he is inside of you, you can move up and down however fast or deep you like. This is a perfect way to keep from feeling the pain of your man going in too deep.

You will need to prop your arms on his legs or your own legs to keep yourself from falling over. Believe me...you don't want to fall over while your man is inside of you.

## A Few Pointers

I won't lie, you are going to need some stamina with this one. If you haven't been doing your squats lately, you are going to be feeling it with this position. I'm not trying to discourage you from trying, but just know you might not be able to walk to the bathroom for a while after you are done.

You might consider using some lube to make it easier to get into position. If you are dry at all, this is not going to end well for you.

Another thing you might want to use is a vibrator. If you can only orgasm through clitoral stimulation, this is not going to do much for you. I suggest you use the vibrator on yourself, instead of having your man do that. He's going to need to use both his hands to hold himself up.
