AIR PURIFICATION SYSTEM

UV-SAFESPACE HEPA APS

KILLS OR TRAPS UP TO

99.8%

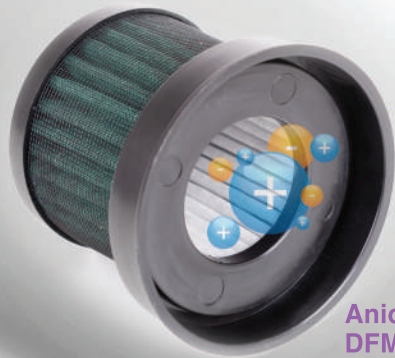

Of Airborne Viruses, Bacteria, Allergens And Odors!

Dynamic Fluidic Modulation™ For Increased Airflow

Advanced Technology Designed To Protect You Anywhere You Go

Advanced Technology, designed to Protect you where you go! UV-Safespace HEPA APS can provide “peace of mind” against viruses such as COVID-19, allergens such as pollen, mold & mildew, and volatile organic compounds (VOC’s), all of which can contribute to sleep and respiratory issues.

Anion DFM Technology

Our compact, portable air purifier features:

- Effective 3-layer filtration with a true HEPA PM 2.5 Filter, a Primary pre-filter and a carbon-activated filter
- Proven UV-light virus killing technology
- Proprietary elective Air Quality Indicator (AQI) continuously measuring our quality, flashing “green” when air is “clean”

The UV-Safespace features and portability make it a perfect fit for residential, commercial and government applications, as well as cars, RV’s and trucks. It can be an essential component of PPE (Personal Protective Equipment) for:

- Rideshare, taxi & limo drivers
- Paramedics and firefighters
- Students and teachers
- Athletic facilities
- Business travellers
- Soccer moms
- Assisted-living & nursing home residents
- Restaurants & hotels
- Cruise ships

KILLS OR TRAPS UP TO

99.8%

Of Airborne Viruses, Bacteria, Allergens And Odors!

- CE Certified
- HEPA 3-layer high efficiency carbon-activated filtration designed to capture up to 98% of airborne contaminants, including pathogens, allergens, Volatile Organic Compounds (VOC’s) and Odors
- UVC-LED light technology which can kill up to 99.8% of airborne viruses and other harmful pathogens
- Proprietary electronic Air Quality Indicator (AQI) on the top of the unit measures our quality continuously, and flashes “green” when the air is “clean”, when particles are under 75 ppm (parts per million)
- 360° air intake, which filters air within a 10’ radius or Up To 100sf
- Unit is quiet, portable (.8 lbs) and fits in a car drink-holder
- Only product on the market using Anion DFM technology, which generates negative ions to attract positively charged contaminants through the filter
- Unit has a proprietary UV Turbo button, which when pressed initiates a 10-minute, high-intensity kill cycle.
- Purchase includes one extra filter (\$15 value), a USB-AC adapter plug (\$5 value) and a 30-Day Satisfaction Guarantee!
