

Earn While You Learn Opportunity

The ICATT Apprenticeship Program is a 3-year program that alternates between work and college, which combines practical skills and theory. You can:

- Gain skills for an in-demand profession
- Earn a debt-free associate degree
- Receive an industry-aligned education combined with hands-on training
- Obtain national and international credentials
- Increase your salary and advance your careers
- Receive an annual travel stipend of \$2,000 from Future Institute

How does it work?

Apprentices earn wages while at work, a stipend while at college, and your ICATT Network Company covers the cost of college tuition and fees as well.

Current programs include high demand positions such as:

- Advanced Manufacturing Technician
- Mechatronics Technician
- CNC Machining
- Pharmaceutical Manufacturing Technician

Virtual Workshops:

September 23rd at 6:00 PM -- introduction to ICATT and Advanced Manufacturing

October may have opportunities for virtual open houses with ICATT company representatives

November 5th at 6:00 PM -- Apprenticeship Details, Financial Model, Commitment, Benefits

January 21st at 6:00 PM -- Completing the Application and What that Means
