

## WHAT IS AVA ARMORYTRAK™?

AVA ArmoryTrak allows Property Book Officers to track assets using Radio Frequency Identification (RFID) tags. Your assets, weapons and/or any other sensitive items in your armory can be checked in/out using cost-effective and safe RFID technology. Use ArmoryTrak to reduce labor tasks and automate your entire inventory.

## BENEFITS AND KEY FEATURES

Increased asset accountability and reduced labor tasks

Real-time individual Property Book records and visibility of assets

Accuracy in distribution and sales of weapons

Cell phone and mobile compatible

## 5 EASY STEPS

1. Place RFID tags on weapons.
2. Connect the tags to the local network.
3. Connect the read point controller to the local network.
4. Configure the read point controller.
5. Check weapons in and out of the armory!

Weapon tracking can be a big burden on a business, so why not gain better safety and visibility through AVA ArmoryTrak?
