

WHAT IS AVA ASSET MANAGER™?

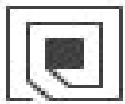

AVA Asset Manager software allows users to track all assets within their business. This asset management system can be used to track property, plant, equipment and personnel down to a specific serial and room number. Through AVA Asset Manager, numerous operational and accounting reports can be generated, such as depreceiation and amortization.

BENEFITS AND KEY FEATURES

Identify facilities down to room including supporting documentation

Track equipment and personnel with Low Energy Bluetooth (LEB), passive RFID, and barcoding

Project and work order accounting (both labor and non-labor costs)

Physical inventory of all assets by room

Easy-to-use interface and web and browser based

Connects with existing systems, providing flexibility for your business

Asset status and readiness dashboard available

Audit trails are provided for all transactions

Gain complete control and visibility over your assets and asset movement with AVA Asset Manager!
