

The **Speech Technology Patents** report is now available from **Tern Systems, Inc.**

Speech Technology Patents is a comprehensive compilation/analysis of the patents that have been issued that address speech technology.

The speech technology patent area is growing rapidly. Over 74% of the 42,992 speech technology patents that exist were issued during the last five years.

Speech Technology Patents 2000-2018 analyzes the identified speech technology patents from a number of different perspectives.

- o Speech technology patent assignee,
- o Speech technology patent type,
- o Speech technology patent by issue date.

The top 100 speech technology patent assignees are identified and their speech technology patent acquisition profile is provided.

The number of speech technology patents assigned each year since 1900 is provided. The leading assignees for each year from 2001-2018 are identified.

For each speech technology patent, the patent number, issue date, application date, assignee, description and abstract are provided.

Each patent is categorized as being one of 50 different categories. For analysis purposes, these Categories are grouped into 6 Types.

Speech Technology Patents is available from Tern Systems. Contact Walt Tetschner at TETSCHNER@aol.com or 978-266-1966.
