

Enso Discoveries, LLC Launches its Domestic, Independently Owned, No Contract or Volume Commitment, Histopathology Laboratory for Veterinary Industry and CROs

Enso Discoveries, an emerging biotech company, is proud to announce the opening of its veterinary histopathology lab featuring board-certified evaluation, priority turnaround times, exceptional value and the ability to process large case quantities without sacrificing quality — for both the individual veterinarian hospital and contract research organizations looking for excellent turnaround times and highly validated results.

MANHATTAN, Kansas ([PRWEB](#)) March 25, 2020 -- Enso Discoveries, LLC proudly announces the opening of its veterinary histopathology laboratory located centrally in the midwest for high-quality, quick-turn, board-certified reporting. In an effort to offer partnering clients the ability to work with a highly motivated, independent, professional team that is focused on incredible quality, turnaround time and value, Enso Discoveries has built the infrastructure and assembled the scientific expertise to readily meet ever-evolving needs of contract research organization clients.

“We envisioned this laboratory over a year ago after successfully working internationally in this space. Six months ago we hired Eric Pace, an outstanding, talented and experienced Laboratory Manager with incredible passion, to build, hire, train and certify our laboratory. We feel that laboratory independence is a lost art with so much consolidation going on and we intend to build great relationships and add great value, to those who appreciate the independent, no contract or volume commitment model,” explains Patrick Farley, CEO of Enso Discoveries, LLC.

It is a continued commitment of Enso Discoveries to hire the best team of experts, pathologists and laboratory personnel to help provide priority lab services at non-priority lab prices. Under the watchful oversight of senior pathologists and experienced laboratory personnel, Enso Discoveries laboratory rigorously adheres to quality management standards applying technical and scientific expertise to every project, from routine procedures to highly specialized analyses.

Enso Discoveries Veterinary Histopathology Laboratory boasts:

- Ability to process large case quantities without sacrificing quality
- Quick turn-around time
- Ability to provide dissection, gross examination, and organ size and weight measurement
- Process samples for embedding and sectioning
- Process samples for H&E, special stains, and Immunohistochemistry
- Digitizing slides and delivery of digital image files
- Perform quantitative image analysis and deliver a comprehensive report

“Our laboratory is a planned, high-production environment using the latest instruments such as the Leica Aperio AT2 imaging system that can process up to 400 slides an hour and dual Sakura tissue processors to ensure continued production. Our pathology network has extensive capacity to perform histologic processing and histopathologic evaluation of large quantities of tissue samples,” Director of Laboratory Services, Eric Pace said. “I am continually impressed with the budget I am supported with which allows me access to the latest in equipment, the best of technology, and the hiring of an amazing staff. Our commitment to quality in our work,

and getting cases out in a timely manner, with the willingness to go the extra mile will be what helps veterinarians make sure they are offering proper treatment to each and every animal patient.”

Pace received his Bachelor's of Animal Science with a minor in Natural and Applied Sciences in May of 2000. He brings 15 years of histopathology experience ranging in research, forensics, private sector, and large hospital laboratory. As an ASCP certified histology technician, he has helped train and teach many students from histology programs to become certified histology technicians. Pace is also a member of the Society of Quality Assurance, National Society of Histology and American Society of Clinical Pathology.

Enso Discoveries, LLC is a biotech company focused on enhancing the lives of animals through the development of relevant, cost-effective, novel technology that allows our valued customer, the veterinarian, to keep their hard-earned business in house. We support our products and services with scientific proof, national distribution partners, and a worldwide network of industry experienced contacts.
