

## **Bill Dandie**

I was born in Hamilton Ontario and attended Brock University where I received a Bachelor of Arts degree in History and Political Science.

In 1997 I started my journey at RTF Global Inc. and over that period of time led a group of employees in the design, manufacturing and distribution of retail display security systems.

In 2003 I purchased the company and led it into the UK market where it saw global growth. We now operate offices out of Orangeville and Daventry.

In 2016 I became President of SensorMedia Inc. which provides software to wireless retailers.

I also have a passion to create experiences for travellers and operate three unique destinations. One in Mono, another in Adjala-Tosorontio and the last in Nippising.

Onthe9 Mono is a 15 acres property just outside of Orangeville which has one of the top Airbnb's in Canada.

The Ketchum House is first an education center for responsible living and conducts Earth Day Tours, every day!

It also serves as an ecotourism destination where people can stay as well as learn about sustainable habits and construction.

In April 2020 I took possession of a remarkable property three hours north and Onthe9 Wolfe Bay is a natural wonderland of forests, rivers, waterfalls, and sand beaches.

In June 2020 I retired from an active role at RTF and serve as the Chairman of the Board.

My main focus now is the Onthe9 experience and the eco journey at Ketchum House.

I am excited to be a member of the Community Living Dufferin board and look forward to assisting with the path that the agency currently is on.
