

Erin Potts

I graduated with a degree from the University of Guelph in 2015 which is when I realized through Family and Child studies courses and volunteer experience in the community, that I wanted to work in the field of social services.

I went on to graduate with a diploma in Child and Youth Care from Humber College and have since been involved in social services working with children and youth with various abilities in multiple settings.

Currently, I am an Educational Assistant with the Upper Grand District School Board while working part-time in virtual recreation program development for Recreational Respite.

My goal is to bring my experience, passion and creativity to inspire and be a part of growth while also learning and gaining new experience for myself.

I am excited for all the possibilities that we, as a team, can bring to life.
