Corporate Overview

Founded in 2005, Aesa Consulting is a telecom and technology boutique consulting firm that provides clients with experienced professionals to implement and deliver cost effective business solutions. Aesa's strengths lie in program management, business process re-engineering and IT cost optimization specifically focused on technical solutions that improve the efficiency of enterprise operations and result in enhanced delivery of services to end users.

Our IT subject matter expertise coupled with our in-depth experience with multiple technologies, enable us to work closely with clients to identify, define and implement the right technology solution to meet business goals and objectives. Collectively, our team has recovered over \$4 billion in IT savings for clients.
