Equestrian Troubleshooting:

Problem: My horse has only ridden in arenas.
Solution: Ride NATRC. Your horse will be super excited to go down the trail with his new friends, and we'll have a potluck afterwards.

Problem: My horse bucks.
Solution: Ride NATRC. So he's got spunk? Put him in Open Class. It's hard to buck when he's trying to keep up and navigating challenging natural obstacles.

Problem: My horse is spooky.
Solution: Ride NATRC. He'll get bored of spooking at leaves after the first five miles or so.

Problem: I have trouble sitting in the saddle for too long.
Solution: Ride NATRC. NSAIDs are only restricted in equine competitors.

Problem: I need to get my confidence back.
Solution: Ride NATRC. We will give you energy drinks* if needed. Also- we have safety riders.

Problem: My horse is green.
Solution: Ride NATRC. Your horse deserves an education. Are you really going to deprive him of that?

Problem: My horse rears.
Solution: Ride NATRC. He won't rear if his buddies are going to leave him behind.

Problem: I can't ride well enough.
Solution: Ride NATRC. It's distance trail riding, not the Olympics. If you can manage to stay on and avoid being a trail missile, you'll probably be fine. We'll help you with the details.

Problem: My horse won't load on the trailer.
Solution: It will only happen the first time. Once he knows how much fun he'll have he will run on.

In short: Ride NATRC and you and your horse will be happy

Roo and I had a fantastic time. Great job Angie with managing the ride - Sherry Garnes

Thank you for having the ride and stepping up to manage!! I had a very difficult weekend but I REALLY Appreciate everything and ALL my NATRC family and Jerry Varn at Broxton Bridge for helping me and Georgia this weekend. Georgia came up lame after we got to the ride then got out during the night and rode her own ride for 7 hours galloping down scary highway roads and cotton fields. Lots of prayers and sweet support from all.

Thanks to each and everyone for your concern kindness! - Patty Lucas

SPECIAL THANKS

I am going to write a short tribute to Nancy Sluys. I lost my saddle and she was the first to respond to my request to borrow one. I went to her place and we tried several until we found one to fit. Since this is only one of the many, many, many things she has done for me, I felt compelled to write a public note of thanks. I can write pages of what Nancy has contributed to me, and others (surrogate daughter Mikayla Nunn!), NATRC and AERC, and so many others, individuals and groups, but I'm just going to mention two things. First, it was in her kitchen that I first heard about an organization called NATRC. With her urging and support.....look where I am now. And second, I think I can sum up Nancy's contributions to all of us by relating something I told her at the end of the last Garrie Bates Memorial NATRC ride at the Virginia Highlands in Cripple Creek, VA. I looked at Nancy and said: “just like Garrie was your mentor, and you are so grateful to her for her friendship and incredible knowledge and well, just everything she did, so am i grateful for what you have done for me. Garrie was to you as you are to me.”. I can't think of any greater tribute than that! Thank you, Nancy.

Southern Trails - brrrrr cold nights but sunny dry days, beautiful and challenging trails, lots of belly laughs, thank you Victoria Light Whitehead and Patty Lovelady Lucas. - Carolyn Chapman

Congrats to all of the participants at Southern Trails this last weekend! It was a beautiful weekend for riding. Thanks to all the volunteers and the multitude of donations of time and talent. - Victoria Whitehead

A mentor who rode with me at a recent competition has urged me to share some of my tips for improving a horse’s performance on the trail. These topics and techniques can take volumes, so I will attempt to distill them to something as short and concise as possible. So here we go…

Paula’s Pointer #1: Find the ‘Calm’ and work there.

When a horse is excited, looking all around dancing, shying, etc, the instinctive side of his brain is in charge. No learning is taking place, only reaction to whatever stimulus is there. If you want your horse to focus on you and learn what you wish to teach or do, you need to remove the reactive stimulus and calm him down so the thinking side of his brain is at the forefront.

So, where do you find the ‘calm’? It varies from horse to horse. You have to search out where this place might be. It might be with a favorite buddy. It might be in a round pen or stall. It might be in a favorite corner of the pasture. When you find it, start your training in that place. Once calm, receptive training becomes the norm in that area, you can then work on expanding the size of that place. If you happen to over expand and lose the ‘calm’, reduce the area and work there longer before expanding out again. You can even deliberately create reactive situations to help teach your horse that you can help him come back to his calm place. Somewhere along the line he will realize that there is safety in you, and he will look to you whenever he feels unsure or unsafe.

Continue expanding the calm area, until the world, and all that is in it, becomes your horse’s calm place. Finding and keeping the ‘calm’ is a lot of work but has great rewards in the resulting partnership. And is the foundation for everything else.
