DOCTORS ON CALL, NY'S PREMIER HOUSE CALL SERVICE, LAUNCHES NEW WEBSITE
Providing the ultimate user-friendly experience, with complete functionality

Brooklyn, NY – Scheduling a doctor's visit at home has never been easier! Doctors on Call, one of New York's leading medical house call services for the elderly, has launched a new website that provides detailed information about services available, the ability to schedule an appointment online, and to sign up for regular updates. The website also provides particulars on each medical provider, insurance, common ailments and diseases, and a blog with the latest medical news and research.

"Our aim is to make life easier for our patients, referrers, and hospitals. Our newly designed website offers easy access to information about our services, whether an individual is looking for ongoing chronic care, post-hospital care, or a simple sick visit. A house call with one of our expert medical providers can be scheduled with the push of a button," explains Dr. Paul Rosenstock, CEO and Medical Director of Doctors on Call. "Patients can also acquaint themselves with our medical providers, including their educational background and the language specialty of each provider. Patients and referrers can also access all the required forms through the Doctors on Call website, so there is no longer any need for tedious paperwork. Patients can continue to call in their referrals if they don't have access to a computer."

Since 1968, Doctors on Call has been providing medical house calls to the elderly and homebound in the comfort of their own home. The medical care service is a 'one stop shop' offering in-home blood work, EKGs, and x-rays; assisting with disease and medication management to prevent further emergencies and hospital readmissions. Appointments can be booked on the website and house calls visits scheduled from 8am to 8pm, 7 days a week, with same day visits available upon request. Doctors on Call's expert medical providers currently service patients living in the five NY boroughs, Long Island, and Lower Westchester. The service accepts most insurance plans and further information is available on the Doctors on Call website, www.doctorsoncallnyc.com.
