

**Doctors on Call on Improving Patient Care:**  
**Meaningful Use**

Doctors On Call will be sharing with you information on some ongoing activities that may have a positive impact on your care. We believe this is important because the more you know about us, the more trust you will invest in us. Doctors On Call is committed to serve you and our providers are dedicated to improve your health.

On that trend, Center for Medicare and Medicaid services (CMS) has a program that awards incentives to medical providers for using certified electronic health records to improve patient care. This program is called Meaningful Use. It is designed with a set of rules that providers must follow to meet recognition and avoid penalties.

The application of Meaningful Use is in three (3) stages:

- **Stage 1** focuses on the adoption of an electronic health records system and data gathering.
- **State 2** promotes care coordination and exchange of patient information.
- **State 3** revolves on improvement of healthcare results.

On a quarterly basis, data are made available on the performance of all providers who are Meaningful Use certified. For electronic documentation, the table below reveals the performance of Doctors on Call providers who, day-in and day-out, strive to provide the best care possible to our patients. It shows the percentage of medications, lab studies and radiology tests that were ordered via our electronic medical records system as well as percentage of medications that the providers discussed with patients at each visit. Date for the last quarter:

Medications	Laboratory	Radiology	Medication Reconciliation
95.36	99.69	100	92.86
100	100	100	100
98.57	100	100	100
100	100	100	100
100	100	100	100
100	100	100	100
100	100	100	100
100	100	100	100
100	100	100	100
99.48	100	100	100
<b>99%</b>	<b>100%</b>	<b>100%</b>	<b>99%</b>

In the near future, measures pertaining to healthcare improvement will be available as well. We will share them with you as they are made available. In the meantime, Doctors on Call will continue its quest to improve your health one day at a time.
