

Remote Teaching/support using Microsoft Teams

It is strongly recommended that you download the TEAMS APP for your device rather than using this in via the online app in your online Office 365.

You can [download the TEAM APP here](#).

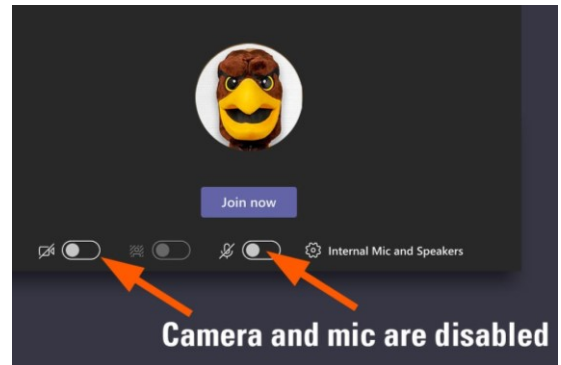

You will receive a notification/email scheduled to your calendar for when the lesson will start.

Click on 'JOIN' to become part of the group/lesson

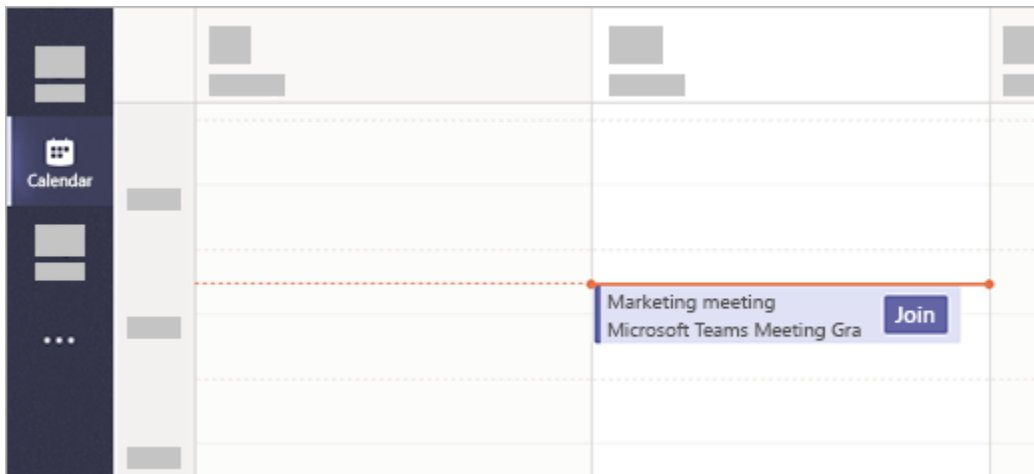

Once you have joined the group and the lesson starts, make sure that you have:

- Switched your **camera off**
- Switched your **microphone off**

Leave both off unless you are asked to switch on by your teacher.

How to join by calendar
