

IOSH MANAGING SAFELY

3 Days

The Institution of Occupational Health and Safety (**IOSH**) is a globally respected chartered body that champions the highest workplace standards of health and safety.

This training programme is designed for any individual who has organisational responsibilities for managing health and safety risks, resources and workplace practices

The flexible new high impact programme covers all the main health and safety issues and is designed to give managers all they need to know to help them handle health and safety in their teams.

The course programme

The course takes four full days to complete and covers, in detail, the core responsibilities of anyone tasked with managing workplace health and safety

- Introducing Managing Safely
- Assessing risks
- Controlling risks
- Understanding your responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance

There is an end of course examination and candidates must produce a small project.

In order to successfully complete the course and gain IOSH certification, delegates must complete a 45-minute examination to assess their learning and carry out a practical assessment to demonstrate the application of knowledge gained
