The Kvinna Till Kvinna foundation supports women in times of war and conflict in order to increase their power and influence. The key to their way of working is cooperation and knowledge sharing, as well as the conviction that women’s organizations themselves are the best judges of what they need in order to develop.

Kvinna Till Kvinna and SIGI- Jordan have been working together for more than a decade, in the field of protecting women in danger. By increasing women inmates’ awareness about their human rights, national legislations, social and psychological counselling and support.

We also worked on awareness raising of Cybercrimes and provided skills and tools for providing protection from such crimes for women leaders, activists and young women around Jordan.
