

ALTERYX SOFTWARE TRAINING

NEWCOMP ANALYTICS TRAINING & SKILLS DEVELOPMENT

OVERVIEW

We believe that the most successful software implementations are the result of educated and empowered users.

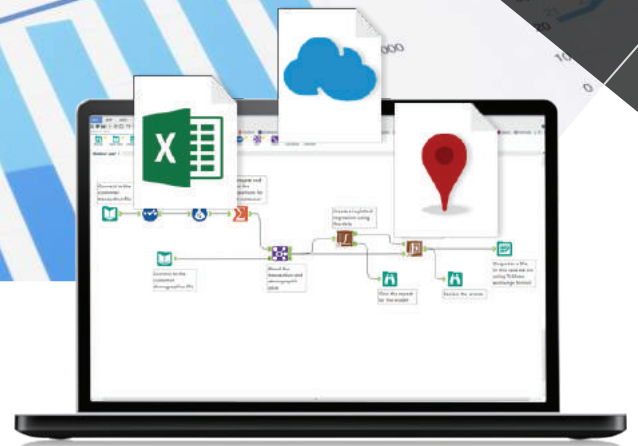

As trusted analytics advisors, we are dedicated to helping our clients with the entire training process, from course selection to registration, location requests, and post-training assistance. We provide customized training paths based on role, skill-level and organizational objectives.

ALTERYX COURSES AVAILABLE

ALT10G - Alteryx Designer – Core Concepts (1 day)

This course provides students with the skills required to prepare for the Alteryx Designer Core Certification Exam. Students will gain a thorough understanding of important concepts that will enable them to prepare, parse, blend, transform and analyze data from disparate sources and output their results. This course provides students with the skills required to prepare for the Alteryx Designer Core Certification Exam.

Prerequisites: None

Audience: Beginner to intermediate level Alteryx Designer users

ALT20G - Alteryx Designer – Advanced Concepts (1 day)

This course teaches students higher-level Alteryx abilities and builds on the Core Concepts course. Students will learn more advanced preparation, blending and parsing techniques. Other areas explored include: spatial analytics for creating points, lines and polygons, creating reports for consumption, macros and applications to minimize workflow dependencies, and an introduction to the Alteryx Gallery. This course provides students with the skills required to prepare for the Alteryx Designer Advanced Certification Exam.

Prerequisites: ALT10G - Alteryx Designer - Core Concepts or equivalent experience

Audience: Intermediate level Alteryx Designer users

ALT30G - Alteryx Designer – Predictive Concepts (1 day)

This course is designed to teach students how to utilize Alteryx to perform predictive analytics. Concepts covered in this course include: Time series, regression, predictive grouping, and how to create an R Macro in Alteryx. Students will learn how to prepare and analyze data before running it through models to ensure to create meaningful predictive investigations.

Prerequisites: ALT10G - Alteryx Designer - Core Concepts or equivalent experience

Audience: Intermediate level Alteryx Designer users

ALT40G - Alteryx Server Fundamentals (1 day)

This course teaches students the ins and outs of Alteryx server deployment, including the Gallery, Controller, and Scheduler. Students will review server architectures, learn to appropriately allocate resources, and provision controller and worker nodes, all with an understanding of modern distributed computing.

Prerequisites: ALT10G - Alteryx Designer - Core Concepts and ALT20G - Alteryx Designer - Advanced Concepts

Audience: Alteryx Designer users looking to implement Alteryx Server through installation and administration
