\_\_\_\_\_

Healthcare provider: List the mo/day/yr for each vaccination given. For combination vaccines, fill in a row for each separate antigen in the combination.

(11/12)

Vaccine	Type of vaccine	Date given mo/day/yr	Healthcare professional or clinic	Date next dose due
Pneumococcal (PPSV23, PCV13)				
Influenza (TIV, LAIV)				
Human Papillomavirus (HPV4 [Gardasil], HPV2 [Cervarix])				
Meningococcal (MCV4 [Menactra, Menveo]; MPSV4 [Menomune])				
Other				

Vaccines are not just for infants and children.

At any age, immunization provides the longest lasting, most effective protection against disease.

Ask your doctor, nurse, pharmacist or local public health office about immunizations for you and your family.

**Keep up to date with your recommended vaccines.**

**ARE YOU UP TO DATE?**

Indiana Immunization Coalition (IIC) is a statewide, not-for-profit 501(c)(3) that seeks to improve access and affordability of immunizations across the lifespan. Through immunization education, advocacy, promotion, and statewide collaborative partnerships IIC reduces the spread of vaccine-preventable diseases.

These materials were created by the Indiana Immunization Coalition, Inc. and were funded by the Indiana State Department of Health through a grant from the Centers for Disease Control and Prevention (Award No: 5H23IP522522-10).

Hepatitis B	3 doses					

-  Boxes this color show that the vaccine is recommended for all adults unless your doctor or nurse tells you that you cannot safely receive the vaccine.
-  Boxes this color show when the vaccine is recommended for adults with certain risks related to their health, job or lifestyle that put them at higher risk for serious diseases. Talk to your doctor or nurse to see if you are at higher risk.
-  Box this color shows that Tdap is recommended for adults 65 years old or older who have contact with babies less than 1 year old.
-  No recommendation

**FOOTNOTES:**

*(Influenza vaccine)* <sup>1</sup>There are four different flu vaccines available—talk to your doctor or nurse about which flu vaccine is right for you.  
*(HPV vaccine for men)* <sup>2</sup>There are two different kinds of HPV vaccine but only one HPV vaccine (Gardasil®) can be given to men. Gay men or men who have sex with men who are 22 through 26 years old should HPV vaccine if they haven't already started or completed the series.  
*(MMR vaccine)* <sup>3</sup>If you were born in 1957 or after, you should have already gotten MMR vaccine. Talk to your doctor or nurse about how many doses you may need.  
**If you are traveling outside of the United States, you may need additional vaccines. Ask your doctor or nurse which vaccines you may need.**

## ADULT IMMUNIZATION RECORD
