

HOW TO MAKE HOMEMADE SLIME

Ingredients

- ✓ 8 oz. bottle Elmer's white school glue
- ✓ 1 1/2 - 2 TBS contact saline solution, more as needed
- ✓ 1 TBS baking soda
- ✓ Food coloring, optional

Instructions

1. Place glue in a bowl. If you're adding food coloring, add it now until desired color is reached. Then mix in baking soda.
2. Add 1 1/2 Tablespoons saline solution and mix until combined. Add 1/2 Tablespoon more at a time if it is too sticky. The more you add, the thicker it'll be. The less you add, the slimier it will be.
3. Stir until you can no longer stir and then kneed with your hands. It will be sticky at first, but keep moving it with your hands until it is no longer sticky and desired consistency is reached.
4. Enjoy! Store in a covered container or ziptop bag. Best to play with on a place mat.

Notes

Use plastic bowls and spoons to make clean up easier.

Make sure to get the color correct before adding the saline. It's harder to mix in when it begins to thicken.

For thicker slime, add more saline solution. For a slimier texture, add less saline.

Slime is best to play with on a place mat, plastic tablecloth or even a trash bag.

Recipe makes about a cup of slime. Can double or triple based on how many kids there are.

To make your
slime extra special
you can mix in some:

- ★ Food coloring
- ★ Scented oils
- ★ Glitter
- ★ Mini styrofoam balls
