

CARBON RULE POTENTIAL CONCERNS

Building Blocks

- Reduce carbon intensity of electricity generation at individual affected EGUs through heat rate improvements
- Reduce emissions from most carbon-intensive affected EGUs by shifting energy generation to less carbon-intensive EGUs
- Reduce emissions from all affected EGUs by shifting energy generation to low- or zero-carbon emitting units
- Reduce emissions from affected EGUs through use of demand-side energy efficiency

Multistate Plans & Compliance Measures

- **Multistate Plans**

- **Consultation**

- **Potential contributions by Tribes**

- **Regional Planning Organizations**

- **Compliance Measures**

- **Rate-Based vs. Mass-Based**

Cap-and-Trade Programs

- **State and Multistate**
 - **Allowances**
 - **Permission to pollute**
 - **Sale proceeds**
 - **Offsets**
- **National**
 - **Tribal Set-Aside**

Renewables & Consultation

■ Renewable

▫ Nuclear Energy

- Transportation External Coordination Working Group (DOE)
- Legacy waste

▫ Biomass

■ Consultation

▫ Tribal Implications
