1,000 random telephone interviews (land- and cell-lines) with Canadians age 18 years and over, ending March 20th, 2020. The data is based on a four week rolling average where each week the oldest group of 250 interviews is dropped and a new group of 250 is added. A random telephone survey of 1,000 Canadians is accurate 3.1 percentage points, plus or minus, 19 times out of 20.
