

About one in six report losing their job/having reduced work hours amidst pandemic; job prospects brighten as three in ten of those Canadians see increase in hours/re-employment in recent weeks

National survey released June, 2020
Project 2020-1647

Bloomberg

About one in six Canadians report they lost their job or had their hours reduced because of the COVID-19 pandemic

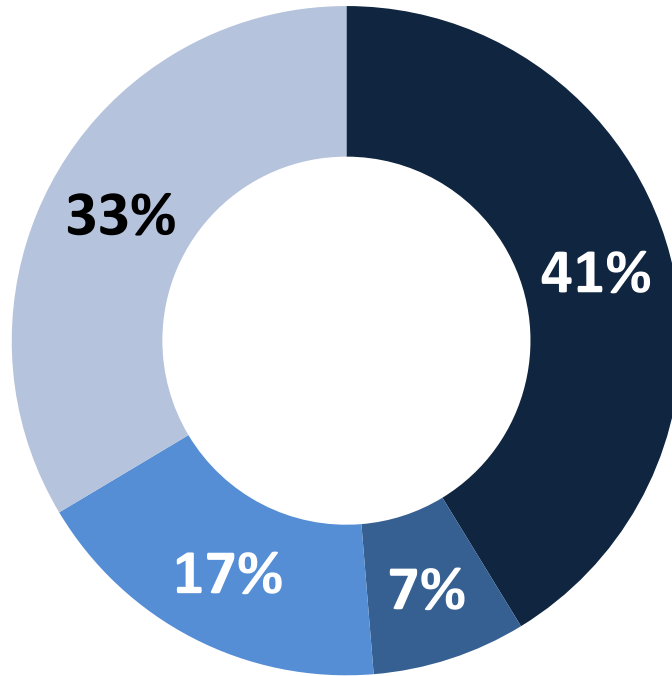

About one in six Canadians report they lost their job or have had their hours reduced because of the COVID-19 pandemic, with residents of the Prairies more likely to report this than residents of Atlantic Canada.

- **Just over two in five Canadians report they were employed before the pandemic and there has been no change in their work hours or employment status in the past two months** – Forty-one per cent of Canadians report that they were employed before the pandemic and there has been no change in their work hours or employment status in the past two months, while 33 per cent of Canadians report they were not working before the pandemic, 17 per cent report losing their job or having reduced work hours because of the pandemic, and seven per cent report losing their job or had reduced work hours because of the pandemic, but in recent weeks have been re-employed or seen their hours increase.
- **Canadians from the Prairies are more likely to report they lost their job or have reduced work hours because of the pandemic than residents in the Atlantic provinces** – One in five Canadians in the Prairies (20%) report losing their job or having reduced work hours because of the pandemic, while under one in ten Atlantic residents (nine per cent) report the same.
- **Just under one in four Canadians have lost their job or had reduced work hours because of the pandemic, while about three in ten of these Canadians have been re-employed or seen their work hours increase in recent weeks** – About 25 per cent of Canadians report losing their job or having reduced work hours because of the pandemic, of those, 7 per cent report having been re-employed or seen their work hours increase in recent weeks, while 17 per cent remain unemployed or having reduced work hours.

These observations are based on a hybrid survey of 1,009 Canadians, 18 years of age or older, between May 26th and 28th, 2020 as part of an omnibus survey.

This study was commissioned by Bloomberg and the research was conducted by Nanos Research.

Employment status since the COVID-19 pandemic

- I was employed before the pandemic started and there's been no change in my work hours or employment status over the past two months
- I lost my job or had reduced work hours because of the pandemic, but in recent weeks I have been re-employed or seen my hours increase
- I lost my job or have had reduced work hours because of the pandemic
- I was not working (e.g. retired, not in the workforce) before the pandemic

I was employed before the pandemic started and there's been no change in my work hours or employment status over the past two months

Atlantic (n=97)	48.1%
Quebec (n=221)	36.8%
Ontario (n=342)	40.1%
Prairies (n=196)	40.4%
British Columbia (n=153)	44.4%
Male (n=521)	43.2%
Female (n=488)	37.9%
18 to 34 (n=212)	64.9%
35 to 54 (n=369)	56.1%
55 plus (n=428)	9.5%

*Weighted to the true population proportion.
*Charts may not add up to 100 due to rounding.

QUESTION – Which of the following would best describe your employment status since the COVID-19 pandemic started?

Employment status since the COVID-19 pandemic by region

	Canada (n=1009)	Atlantic (n=97)	Quebec (n=221)	Ontario (n=342)	Prairies (n=196)	British Columbia (n=153)
I was employed before the pandemic started and there's been no change in my work hours or employment status over the past two months	40.5%	48.1%	36.8%	40.1%	40.4%	44.4%
I was not working (e.g. retired, not in the workforce) before the pandemic	33.0%	32.7%	34.5%	33.2%	31.3%	31.9%
I lost my job or have had reduced work hours because of the pandemic	17.4%	9.4%	16.0%	18.6%	20.0%	16.8%
I lost my job or had reduced work hours because of the pandemic, but in recent weeks I have been re-employed or seen my hours increase	7.3%	7.6%	11.7%	5.8%	5.9%	5.7%

QUESTION – Which of the following would best describe your employment status since the COVID-19 pandemic started?

Employment status since the COVID-19 pandemic by gender and age

	Canada (n=1009)	Male (n=521)	Female (n=488)	18 to 34 (n=212)	35 to 54 (n=369)	55 plus (n=428)
I was employed before the pandemic started and there's been no change in my work hours or employment status over the past two months	40.5%	43.2%	37.9%	64.9%	56.1%	9.5%
I was not working (e.g. retired, not in the workforce) before the pandemic	33.0%	30.1%	35.7%	1.5%	5.5%	79.5%
I lost my job or have had reduced work hours because of the pandemic	17.4%	16.5%	18.3%	20.7%	25.9%	7.5%
I lost my job or had reduced work hours because of the pandemic, but in recent weeks I have been re-employed or seen my hours increase	7.3%	7.7%	6.9%	9.7%	10.9%	2.3%

QUESTION – Which of the following would best describe your employment status since the COVID-19 pandemic started?

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,009 Canadians, 18 years of age or older, between May 26th and 28th, 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ± 3.1 percentage points, 19 times out of 20.

This study was commissioned by Bloomberg News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description
Research sponsor	Bloomberg News
Population and Final Sample Size	1,009 Randomly selected individuals.
Source of Sample	Nanos Hybrid Probability Panel (confirm with John)
Margin of Error	±3.1 percentage points, 19 times out of 20.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online
Number of Calls	Maximum of five call backs to those recruited.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.
Field Dates	May 26 th to 28 th , 2020.
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Estimated Response Rate	Ten percent, consistent with industry norms.
Question Order	This was the only question asked on this topic.
Question Content	This was topic five of an omnibus survey. Previous topics included political issues, economic issues, perceptions of real estate, and COVID-19.
Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
