

Climate change ambition on the rise.

Nanos Research was retained by Positive Energy at the University of Ottawa to conduct research among Canadians on issues related to the energy sector.

The survey gauged the level of concern Canadians have with regards to the impact of climate change on the economy, as well as the importance of prioritizing jobs versus the environment, and the importance of the oil and gas sector.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,096 Canadians, 18 years of age or older, between November 26th to 29th, 2020 as part of an omnibus survey.

The margin of error for a random survey of 1,096 Canadians is ± 3.0 percentage points, 19 times out of 20.

The research was commissioned by Positive Energy at the University of Ottawa and was conducted by Nanos Research.

Key Findings

1

Canadians are increasingly likely to say now is the best time for Canada to be ambitious about climate change (mean score of 6.0 out of 10; mean of 5.5 in June).

2

Canadians say the oil and gas sector is more important to Canada's current economy (mean of 7.3 out of 10) than to its future economy (mean of 5.8 out of 10).

3

Canadians are more likely to agree that protecting the environment should be given priority, even if it causes slower economic growth or some job loss (54%).

4

Quebec residents are more likely to say now is the best time for Canada to be ambitious about climate change (mean of 7.1) than residents of British Columbia (mean of 5.9) or the Prairies (mean of 4.3).

Key Findings – By party support

1

Canadians who usually vote Conservative are more likely to say this is the worst time to be ambitious in addressing climate change (mean of 2.7) than Canadians who usually vote Liberal (mean of 7.3) or NDP (mean of 8.1).

2

Canadians who usually vote NDP or Liberal are more likely to say protecting the environment should be given priority even if it causes slower economic growth or some job loss (83% or 68%, respectively) than those who usually vote Conservative (16%).

3

Canadians who usually vote Conservative rate the importance of oil and gas to Canada's future economy higher (mean of 8.3) than Canadians who usually vote Liberal (mean of 4.8) or NDP (mean of 3.9).

4

Canadians who usually vote Conservative are more likely to say they don't trust any sources for news about climate issues and energy issues (26% and 19%, respectively) than Canadians who usually vote Liberal (four and five per cent, respectively)

Key Findings – By political ideology

1

Left-leaning Canadians are more likely to say this is the best time to be ambitious in addressing climate (mean of 8.3) than right-leaning Canadians (mean of 2.9).

2

Right-leaning Canadians are more likely to say growth and creating jobs should be the top priority, even if the environment suffers to some extent (72%) than left-leaning Canadians (eight per cent).

3

Right-leaning Canadians rate the importance of oil and gas to Canada's future economy higher (mean of 8.1) than left-leaning Canadians (mean of 3.5).

4

Left-leaning Canadians are more likely to say they trust science/peer reviewed research for news on climate and energy issues (32% and 29%, respectively) than right-leaning Canadians (18 and nine per cent, respectively)

Good time for Canada to be ambitious in addressing climate change

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,096 Canadians, 18 years of age or older, between November 26th to 29th, 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,096 Canadians is ± 3.0 percentage points, 19 times out of 20.

The research was commissioned by Positive Energy at the University of Ottawa and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Positive Energy at the University of Ottawa	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1096 Randomly selected individuals.		
Source of Sample	Nanos Hybrid Probability Panel	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Type of Sample	Probability		
Margin of Error	±3.0 percentage points, 19 times out of 20.	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey		
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Estimated Response Rate	13 percent, consistent with industry norms.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Number of Calls	Maximum of five call backs to those recruited.	Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views the COVID-19 pandemic, social media, charitable organizations, the Fishery, and gardening.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Field Dates	November 26 th to 29 th , 2020.	Research/Data Collection Supplier	Nanos Research
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
