Evaluating the impact of energy policies on working New Jerseyans

NJ Exits PJM

NJ BPU is threatening to leave the regional PJM energy market.

Lose-Lose. Leaving PJM will lead to higher energy costs and less resiliency/reliability.

Feasibility

NJ is a co-founder of PJM, one of the oldest and largest energy markets in the country.

Reliability

Leaving PJM would make NJ like TX, a separate energy entity less able to rely upon neighbors in an energy crisis.

Cost

Leaving PJM will drive energy prices up for consumers and businesses.
