

Dear Math II, Math I & Foundations of Math Parents,

It is my pleasure to introduce myself to you. My name is Wole Ajala, and I will be teaching Math II, Math I and Foundations of Math this school year at Carter G. Woodson School. This will be my twelfth year as a Math and STEAM (Science, Technology, Engineering, Art, and Math) Educator in the State of North Carolina. I received my 6th – 12th grade professional teaching credentials in Mathematics and Physics from Greensboro College, Greensboro, NC and my master's degree from University of New England. I am currently pursuing my PhD at Walden University.

be
North

My experiences combined with my real-world application teaching methods have proven to be successful for many students that I have had the pleasure of working with throughout my career.

My hobbies are Scrollsaw Arts & Crafts, Gardening and Renewable Energy (Solar Photovoltaic energy and Bioenergy). They are incorporated through class projects that use Geometry, Algebra and Physics. My students will be introduced to integrated applications connecting Mathematics, Arts and Science. In addition, I have a 16-foot climate-controlled mobile trailer equipped with machines and tools for hands-on STEAM after-school activities. Many of the projects created by students in the past have been donated to charities. They have also been provided as a gift for graduating seniors.

I look forward to a great academic year of engaging and rigorous work. The mission of Carter G. Woodson provides a unique opportunity for me as an educator, and I am proud to be able to share the world of math through an Arts-integrated approach to teaching and learning. You can expect your son/daughter to have weekly practice problem worksheets to be completed at home. Tutorials are provided before school. I expect my students to excel in both class and state mandated assessments.

I firmly believe that the best education will take place when the parents, students, and teachers work together as a team. With that in mind, feel free to contact me by phone at (336-733-6838) or by email at wajala@cartergwoodsonschool.org

I am looking forward to working with you and your child this academic year. I assure you I will work diligently to make our classroom environment intellectually safe, engaging, and productive.

Thank you again for this opportunity to introduce myself.

Best Wishes to you and your family.

Sincerely,

Wole Ajala MSc

Math II, Math I & Foundations of Math Teacher
