Physical Science

- In this course we will learn physical and chemical properties such as:
 - Forces & Motion
 - Energy Transfer
 - Changes of Matter

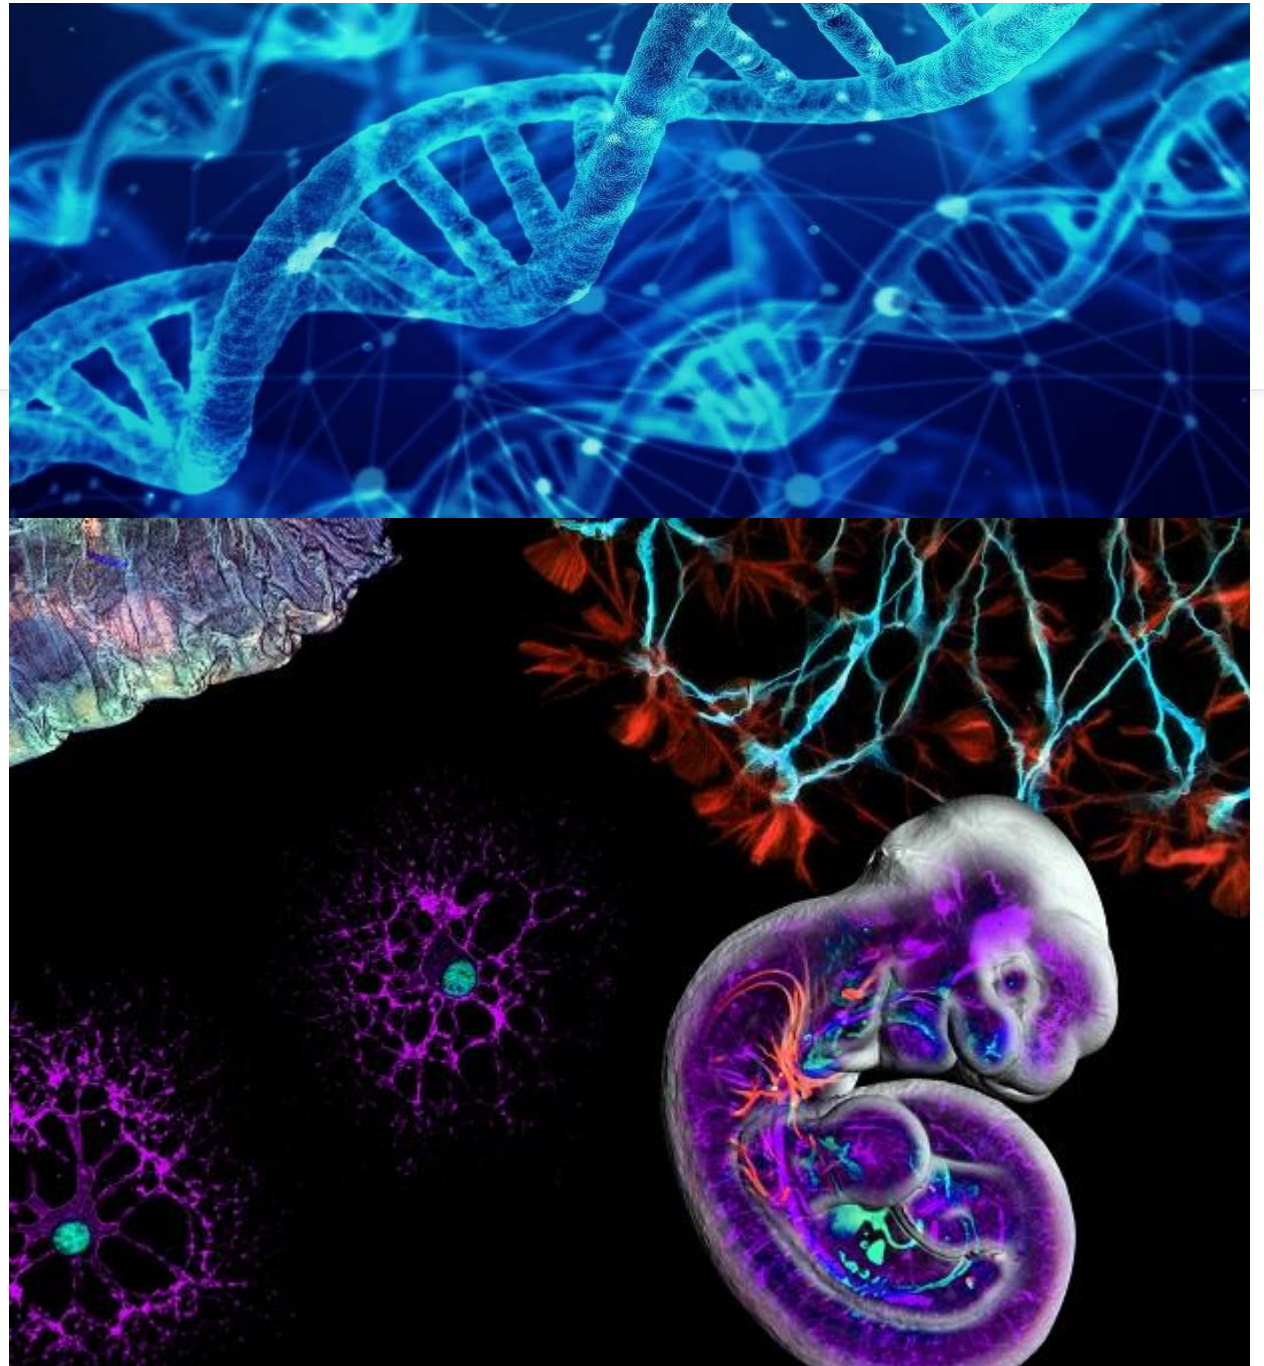

Global Science

- In this course we will learn about how science affects the entire world based on:
 - Toxicology
 - Agriculture
 - Air & Water Quality
 - Energy
 - Weather, Climate

Biology

- In this course we will learn about living organisms and their interactions with their environment:
 - Molecular biology
 - DNA & Genetics
 - Evolution & Classification

Earth & Environmental Science

- In this course we will learn about Earth's processes and systems:
 - Lithosphere
 - Hydrosphere
 - Climate change
 - Alternative Energy
 - Human Impact
