

## Oshkosh 1999 Pedal Pietenpol

A truly realistic model of the Grand-Daddy of all home built aircraft with its Model "A" Ford engine. Details like spark plugs, radiator, exhaust and a flexible propeller driven by the adjustable height pedal crank. The fuselage and wings are built from 3/8" plywood. The adjustable pedal crank assembly provides two positions allowing for a growing pilot. Steering is done from a joystick that is linked to a tail wheel assembly.

You may paint your craft any light and dark color.

Trim your PEDAL PIETENPOL with the black and white decal set.

A Plans set with step by step instructions is available. They include full size patterns for all wood, sheetmetal parts, and dimension drawings for the steel fabricated parts. A parts list is also included. Kit order forms are also included for those who would like to have a parts prebuilt and ready for assembly. A hardware and wheels kit is also available to help the builder it , all the hardware items required to build one Pietenpol Pedal plane are included.
