

Residue[®] WS T&O

BioFertilizer

Residue[®] WS T&O is a blend of fungi and bacteria that accelerate the breakdown of residues; especially tough organic residues like thatch and autumn leaves. When these are broken down quicker, more of the carbon in them is captured and recycled to help build soils. When soil building is accelerated, nutrient uptake by plants is enhanced and soil health is improved. That increase in soil health kickstarts growth and delivers healthier turf, trees, and shrubs.

Key Benefits:

- Fast breakdown of grass clippings, leaves, and thatch
- Increases soil nutrient availability including phosphorus
- Improves soil health through biology
- Water soluble and easy to store
- Good tank mix partner with fertilizer

Key Ingredients:

- *Phanaerochaete chrysosporium*
- *Tricoderma reesei*
- *Bacillus spp*

General Turf & Thatch Influence Rate:

Mix 2.5 – 3 oz of material in 50 – 100 gallons of water per acre.

Overseeding, Newly Seeded Areas & Sod General Rate:

Apply 1 – 3 oz of material per 5,000 sq. ft.

Tree & Shrub Care General Rate:

Initial Application: Mix 2.5 – 5 oz per 100 gallons water.

Maintenance: 2.5 oz per 100 gallons water.

Consult label for specific rates
& application instructions.
