

Intraoperative Neuromonitoring: Putting Patients First

A winning strategy for achieving a high-quality, integrated surgical environment

Your Partner in Electroneurodiagnostics

Healthcare is quickly becoming a consumer-focused business.

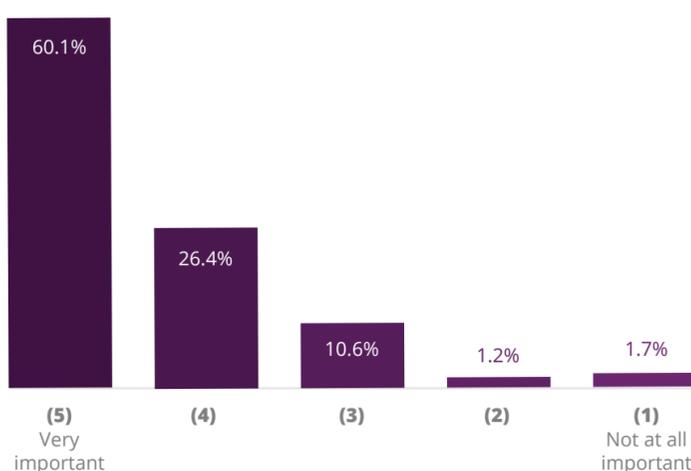

Expanded ambulatory care, enhanced customer service and a greater emphasis on patient convenience all are tangible examples of where we're headed as an industry. The reasons are complex, but patients overall are paying more out of pocket than they have in the past and are exhibiting more traditional consumer buying behavior like checking reviews and comparison shopping and budgeting for elective care. And hospital leaders are taking notice — and responding.

Survey: Top 10 issues facing hospital executives in 2018

- Financial challenges
- Governmental mandates
- Patient safety and quality
- Personnel shortages
- Behavioral health/addiction issues
- Patient satisfaction
- Access to care
- Physician-hospital relations
- Technology
- Population health management

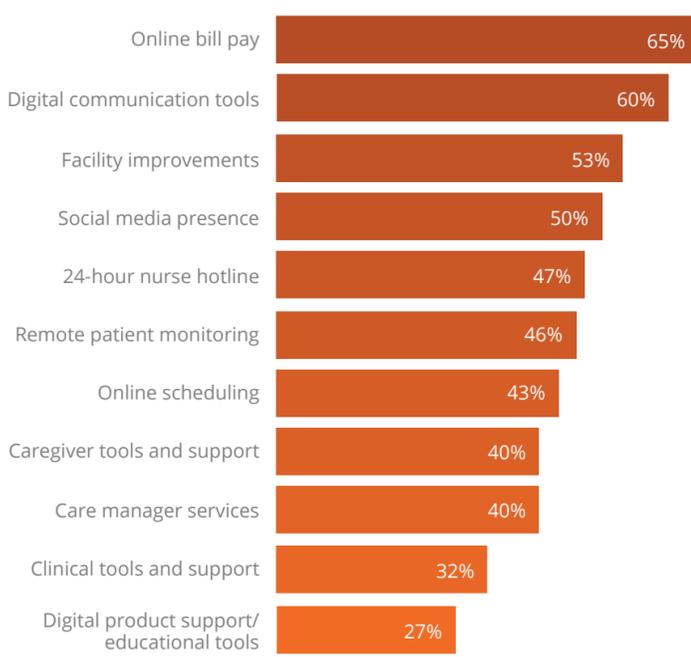

How important is a hospital's reputation?

Patients place a high premium on experience, satisfaction measures when scheduling overnight care

Meeting market demand

Hospitals are making new investments to boost patient satisfaction, survey shows

To meet the growing needs of today's patients, leading providers also collaborate on Intraoperative Neuromonitoring programs and solutions that protect an anesthetized patient's neuromuscular system.

Through well-honed clinical and business management processes and procedures, Catalyst Partners helps to develop and execute successful IONM programs for hospitals and health systems, healthcare providers as well as independent IONM companies. These programs combine

IONM-specific management experience with the knowledge of local communities and clinical excellence to co-create IONM businesses that are profitable and at the height of patient care.

Emphasizing patient education and safety efforts, IONM partnerships mean happier patients who have a full understanding — including risks, benefits and alternatives — prior to their procedures. Interested in learning more about how an IONM partnership can improve patient safety and satisfaction? Let's talk. Catalyst Partners is the strategic operations and management affiliate of a well-respected and successful end-to-end provider of IONM services.

Best practices for clinical excellence and financial success
