FOR IMMEDIATE RELEASE

Chase Plastics and Interfacial partner to bring unique resin solutions

Clarkston, Mich. (December 5, 2018) — Underscoring their commitment to bringing customers exceptional value and providing outrageous service, Chase Plastics announced today the formation of a new supplier partnership with Wisconsin-based Interfacial. The relationship, which takes effect immediately, is unique in that it will provide Chase Plastics' customers the opportunity to work in tandem with a Research and Development (R&D) focused supplier with the goal of developing non-existent material and process solutions.

By partnering with Interfacial, whose mission is “Helping Innovators Incubate,” this new venture focuses on providing materials specifically designed to the customer needs and business goals. Together, Chase Plastics and Interfacial can explore the ability to create and develop custom materials — including sustainable materials, advanced composites and specialty compounds — to fill the void where there may not be an existing material solution. “We’re excited about the capabilities and resources Interfacial will provide to our customers,” said Chase Plastics’ Vice President, Adam Paulson. “With the addition of their team and expertise, we’re not only rounding out our product and service portfolio but creating more value for our customers – something in which we strive for every day.”

About Interfacial

Interfacial is focused on the development and commercialization of technology platforms relating to advanced materials and manufacturing processes for the plastics and composites industry. Our core purpose is to “Help Innovators Incubate” leveraging our core competency in Advanced Composites, Specialty Compounding, Sustainable Materials and Additive Manufacturing. Founded in 2015, Interfacial has achieved >100% CAGR, has revenues just over \$10 million and employs a staff of 45. For more information, see www.ifllc.com.

About Chase Plastics

Chase Plastic Services, Inc., is a stocking distributor with a portfolio that offers more than 18,000 varieties of specialty, engineering and commodity thermoplastics from the industry's leading manufacturers and global suppliers. As a top-ten U.S. engineering plastics distributor, Chase Plastics is committed to helping their customers turn resin into reality by Redefining Resin Distribution.®

The Company, formed in 1992, surrounds customers with an industry-leading portfolio of value-added services delivered by skilled sales professionals and dedicated teams of technical process engineers, application development engineers and more – all of whom guide the material selection, application development and manufacturing processes. The Company's unmatched level of dedicated support, together with blending, repacking, inventory management and logistics services via a network of distribution and sales locations throughout North and Central America, is singularly focused on helping customers boost efficiencies and profitability.

Based in Clarkston, Michigan, Chase Plastics was founded by Kevin and Carole Chase, who serve as the Company's President and Vice President, respectively. Learn more about Chase Plastics and its commitment to providing outrageous customer service at www.chaseplastics.com
