

# Transit Notice

## Essential rail repair at The Queensway and Windermere intersection

**Date:** March 28 and 29, 2015

### Work description and purpose

The TTC will be conducting a rail repair to a short section of track at The Queensway/Windermere intersection. A 200 foot section of rail will also be replaced under the overpass near the Humber Loop. The work will include replacing rail, welding, grinding and placement of concrete.

Starting at approximately 7:30 a.m. on Saturday, March 28 a crew will begin breaking and removing the concrete in the track area to expose the rail for repair. This portion of work will be carried out during the daytime.

Once the section has been excavated, a new piece of rail will be installed and welded. This work will be completed by 9:00 p.m. Saturday evening. Concrete placement will follow on Sunday morning. While efforts will be made to keep noise levels to a minimum, noise will be unavoidable when certain equipment is in operation. The work area will be cleared for the resumption of Queen streetcar service on Monday morning.

### Traffic restrictions

Traffic through the intersection will be maintained. The southbound curb lane on Windermere Avenue will be closed to accommodate this work and provide a safe work zone for the crew. Pedestrians will be redirected to cross on the east side of the intersection.

### TTC service

Streetcars on the 501/301 Queen route will be diverted to accommodate this work. Queen streetcar service will resume in this area on Monday morning.

- 501/301 Queen streetcar service will turn back east at Roncesvalles Avenue.
- 501/301 Queen bus service will run on Lake Shore Boulevard and on The Queensway between Long Branch loop and Roncesvalles Avenue, diverting in both ways via; Park Lawn Road and The Queensway.

We apologize for any inconvenience resulting from this essential rail repair. Thank you for your patience while we work to improve transit in Toronto.
