## **The Real Secret to All-Day Energy**

**An Evolution in Functional Nutrition for Boosting Energy Levels... Healthy Immune Defense... Shedding Unwanted Body Fat... Rebuilding Muscle... Maintaining Healthy Joints... Clear Thinking & Decision-Making... Taming Inflammation...**

And How to Solve Your Energy Problems  
- at a Quarter the Cost of a Red Bull

Dear Energy-Starved Friend,

Are you exhausted all the time? Taking longer to recover from a workout... or from surgery... fading during an important meeting... keeping up with the kids... or your friends... forgetting an anniversary...

Many of my friends and family complain of persistent, ongoing fatigue. Sometimes it's a lack of sleep, but in most cases, there's another, overlooked issue going on.

*If you rely on coffee, a Red Bull or other energy drink, sugar-laden foods or medication to provide you with the stamina you need to get you through your day... I may have just what you're looking for. So please read on...*

They say that "necessity is the mother of invention". While I struggled with running a successful bio-tech company and doing what I could to keep my energy up...

About 4 years ago my 90 year old father suffered a heart attack. While all eyes were on his recovery, my mother's health began to slide. Fast. She had

frequent falls and was ever more forgetful. But everyone just put it off to the rapid onset of “old-age”.

**She had just been diagnosed with depression  
& dementia by her doctor who sent her  
home feeling doomed...**

Dad got better but Mom just kept getting worse. The doctors and mainstream medicine had nothing to slow her decline. But I wasn't about to give up so easily.

My name is Martin Munzer. And I have a Masters in engineering. This may sound a little crazy but *I took this on as an engineering project.*

As an engineer I learned to design and build things from scratch. If I was to build something to last, it needed a strong foundation and excellent maintenance. Much like the human body...

**The Building Blocks of Life**

Three Noble Prize-winning scientists discovered DNA way back in the 1950's. This groundbreaking study launched a ton of research in ***how our body functions on a molecular level***. So in 1997 I started working in the field of genetics.

We now know that there is more to our physical well-being than what's hardcoded into our genes. There are chemical structures that reside on and around our genes. They influence whether certain genes are turned on or off.

Specific nutrients in our diet contribute to, and promote these chemical structures. And a lot of this gene “programming” is lost during the aging process. *Starting as early as in your 20's...*

So *Epigenetics* tells us how nutrients influence how our body works. I buried myself in the aging process and all the factors that contribute to it. Because I wanted to restore my mother's health.

**Fight Back Against Chronic Fatigue!**

I found the body's efficiency in digesting and breaking down critical nutrients from our diet dramatically *reduces as we age*.

Critical nutrients like amino acids that control; hormones (including Human Growth Hormone), growth and repair of muscles, regulated blood sugar, burning fat, enzymes for digestion and reducing inflammation. Everything that supports life.

The lack of these nutrients cause deficiencies that slow all metabolic functions. Our genes begin to behave differently. Disease sets in and we start to *show our age*.

Some of these amino acids come from our diet, and the body produces others. If we don't get what we need we get sick. And die.

### **An Anti-Aging Breakthrough that Works for Both Men and Women!**

It took me two years and using my mother, father and myself as "guinea pigs" to develop the solution. This was the genesis of LEAP. My goal was to:

- 1. Maintain and rebuild all body tissues**
- 2. Promote the formation of beneficial epigenetic structures around the DNA**
- 3. Increase the body's detoxification of harmful metabolites that have built up during years and decades of aging**

The resulting LEAP formulation *not only achieved its goal, but surpassed it beyond expectation*.

*"I started using [LEAP] and noticed that I was losing body fat. My muscles were more noticeable. This change occurred without changing my diet or exercise. I then began to notice even more weight loss and muscle gain. My joints did not bother me as much and I could move better". ~ Dr.*

**McCaughey – Award-Winning Fitness Specialist**

After a few months of using LEAP my mother's memory began to clear. She went from using a walker, to walking with a cane... and then needing no assistance at all!

## **Tackle Chronic Fatigue, Jump Start Your Immune Defenses, and Recharge Your Brain**

These are results that no other protein bar, shake, supplement or drug has been able to accomplish.

So if you get tired easily, have a weakened immune system, or injuries that take a long time or refuse to heal...

You could have an essential amino acid deficiency. The majority of amino acids build protein, but some are also critical for keeping your brain healthy.

**LEAP is ideal for promoting youthful regeneration in all of your body's critical systems.** *No matter what your age.* The breakdown in efficiently processing and producing these critical, life-giving nutrients begins as early as 20 years old!

### **Accelerate Your Own Body's Youth Hormones Regeneration**

And now there's a simple method that you or a loved one can start using right now. I created a unique combination of amino acids, MHT and essential vitamins in LEAP. ***The power of this formula is in how they work together.***

LEAP's ingredients work synergistically to...

- ✓ **Boost energy levels** and vitality
- ✓ Dramatically **elevate memory and mental clarity**; quicken learning ability
- ✓ **Strip away brain toxins** that can lead to Alzheimer's—avoiding dangerous drugs
- ✓ Ram your immune system into high gear; **re-build powerful defenses** against bacteria, viruses and toxins

### **Reset your biological clock and turn back the hands of time.**

So instead of taking a drug for your heart, and a drug for your brain, and a drug for your muscles... *or grabbing for an energy drink...*

**What if you could take one thing that would replace them all?** An all-natural, easy-to-use supplement. And **give your body what it needs to heal** and rebuild itself to a younger version.

Just take one scoop of LEAP in a small glass of lukewarm water, add your favorite juice if you like and jumpstart your day.

And today, for less than the cost of a daily Starbucks Tall you can begin to restore your health.

But first, I'd like to tell you what's in LEAP. I developed a unique combination of 33 essential nutrients including amino acids, MHT (from coconuts), and essential vitamins.

#### **Ingredients**

*To assemble all of these essential nutrients individually would set you back around \$505 per month.* But together in the LEAP formula you get it for a fraction of the cost.

#### **How Much Nutrition Does LEAP Contain?**

LEAP is an evolution in nutrition. I formulated LEAP to provide your body with the *essential nutrients* known to be the building blocks for:

- ✓ Muscles

From studying and analyzing literally thousands of clinical trials and research studies we know that ...

LEAP delivers a **custom blend** of highly bio-available macro, micro and botanical nutrients. The fuel to help your body reach optimal performance. And support epigenetic regulation.

Two scoops of LEAP daily could give your body a full day's worth (again depending on body weight).

And now? You have a once-in-a-lifetime chance to safely **skyrocket your energy**. And once again **enjoy a sense of well-being**.

You won't find this unique formula anywhere else – trust me. It took me over two years of trial-and-error, and plowing through decades of research to create LEAP.
