

Quik-RollTM Security Door

Securing important documents or patient information to meet HIPAA compliance has never been easier.

Quik-Roll Security Door from Aurora can help meet your needs.

The locking Quik-Roll installs on new Aurora Shelving, or retrofits to existing Aurora Shelving within minutes. Your files stay in place, no need to unload. You lose no filing space. Downtime is measured in minutes.

Lock the unit with a single push-button keyed lock. Unlock the system and the counterbalanced door gently springs up. How's that for quick security?

Quik-Roll can also provide security for Aurora Mobile applications, both new and existing.

Quik-Roll™ Security Door

Features

Housing and Door Design. Quik-Roll's housing is pre-assembled and contains a counterbalanced spring for easy lifting. This design also acts as a brake to prevent rapid closing speeds. Lightweight metal slats combine a polyurethane foam core with an aluminum cover to create a modern and finished look when the door is closed.
