

The Beadery[®] Pop Tab[™] Shamrock

Celebrate St. Patrick's Day with this quick and easy shamrock magnet made out of Pop Tabs[™] from The Beadery[®].

Materials needed:

- 6 Green Pop Tabs[™]
- 1 Green 20mm Faceted Stone
- 2" Green Chenille Stem
- 1 Round Refrigerator Magnet

Tools needed:

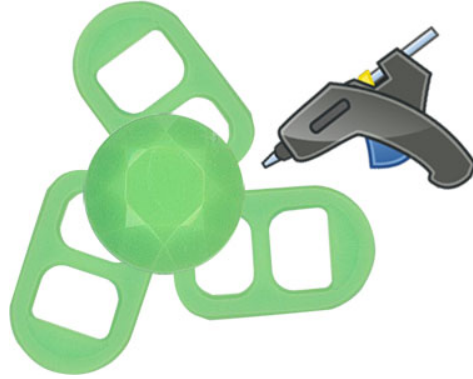

Hot Glue Gun

Instructions:

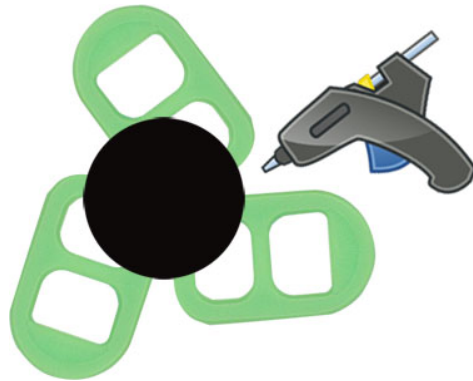

Step 1: Place three Pop Tabs[™] as shown in the image below. You can place them directly on top of the image to align them.

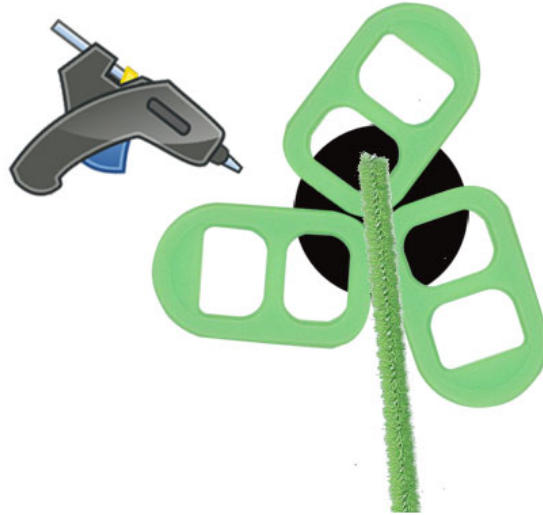

Step 2: Apply enough hot glue to the back side of the 20mm faceted stone to ensure contact with all three Pop Tabs[™] and press the stone down in the center.

Step 3: Repeat Steps 1-2 to attach the round refrigerator magnet to the center of the other three Pop Tabs[™].

Step 4: After it has cooled completely, turn the piece with the magnet over. Using a small amount of hot glue, secure the chenille stem.

Step 5: Apply some more hot glue to the Pop Tab[™] side of the piece with the stone and place it down on top of the chenille stem. Make sure to align the Pop Tabs[™] so that they form the 3 heart shaped leaves of the shamrock. Press the parts together until the glue has cooled completely.
