

Sphinx Orthodontics Emergency Appointment Protocol for COVID Prevention

Only the patient should come into the office, friends and family members should wait outside of the clinic to promote the health and safety of all.

A staff member will scan their temperature as they enter the clinic and screen them for any symptoms such as fever, cough, etc.

Patient will be directed to wash their hands at the brushing station for one minute and use medical grade mouth wash to rinse their mouth

After the patient has washed their hands and rinsed their mouth, they will wait in the waiting room until they are called in. They should be keeping 6 feet from others

Dental Assistant will call the patient in once the Doctor is ready and seat them in a fully disinfected chair. The Assistant and Doctor will be wearing PPE gear to perform the emergency procedure.

Once the procedure is completed, we ask the patient to wash their hands for one minute at the brushing station before they exit the clinic
