

Federal, state and local government agencies can now purchase Information Technology Professional services from ACG on the GSA Schedule.

N. Charleston, SC - March 13, 2015

Athena Consulting Group, LLC (ACG), an Information Technology Services company specializing in Information Assurance / Cyber Security and Information Systems Engineering, Administration and Support, has been awarded a five year General Services Administration (GSA) IT 70 Schedule contract number GS-35F-243CA under category (SIN) 132-51— Information Technology Professional Services.

ACG was scrutinized via a meticulous process by which the GSA assesses a company to assure excellence in providing products and/or services to the federal government. By awarding ACG a GSA Schedule 70 contract, ACG is recognized as a preferred vendor, authorized to conduct business with government agencies.

The GSA Schedule Contract is the largest, most widely used US government contract vehicle. ACG looks forward to developing a business partnership and a mutually beneficial relationship with all potential GSA Schedule clients. For corporate partners interested in teaming, please contact ACG at (571) 765-6120 or businessdevelopment@athenaconsultinggroup.com.

About ACG:

Athena Consulting Group, LLC (ACG) is a certified Veteran Owned Small Business (VOSB) under \$14M, founded in 2004, providing expert level support in (1) Information Assurance / Cyber Security (2) Information Systems Engineering, Administration and Support and (3) Portfolio, Program, and Project Management. Over the past ten years, ACG has served customers including the US Navy (SPAWAR), Defense Health Agency (DHA), Veteran's Affairs (VA) and the State of West Virginia. ACG staff members have authored numerous leading documents for its customers to include the Navy Medicine Perimeter Protection Plan, the Navy's Unclassified Trusted Network Protection (UTNProtect) Policy and the DISA Medical Devices Security Technical Implementation Guide (STIG). ACG team members led - and are leading several Navy Medicine Enterprise Cybersecurity program activities and perform Certification & Accreditation (C&A) support, mitigation and remediation support, Independent Verification and Validation (IV&V), Security Test & Evaluations (ST&E), Computer Network Defense, router analysis, intrusion prevention system support, firewall analysis, risk management, networking technology design and integration, onsite Interim ISSM and Information Assurance Vulnerability Management (IAVM) activities. Our ST&E team developed an in house tool for rapid FISMA/DIACAP compliant POA&M generation and update that has saved thousands of man hours for our clients. ACG has a DCAA approved accounting system, is certified as a Corporate Fully Qualified Navy Validator (FQNV) by the Office of Navy Certifying Authority and is a member of the Amazon Web Services Partner Network.
