Lather, Rinse, Repeat

ROAD TRIPPING WITH FIDO? VISIT JURASSIC PET WASH BEFORE HEADING OUT OF TOWN

THERE'S NOTHING LIKE TRAVELING with your tail-wagging best friend to make a road trip more fun, but it also requires some extra planning. Nothing is worse than hopping in the car with your furry four-legged companion for a road trip and realizing he is in desperate need of a bath.

Whether Fido got into the neighbor's trash, rolled around in something foul at the dog park or is just plain dirty from regular doggy play, a visit to Jurassic Pet Wash is a must before you head out of town with your pooch for summer vacation. And out-of-towners driving through Austin can add Jurassic Pet Wash to their itinerary.

This unique, self-contained pet wash is located on the premises of iconic, dinosaur-themed Jurassic Car Wash in South Austin (4809 S. Congress Ave.). It's perfect for Austinites who want to quickly and inexpensively bathe a pet without dirtying up their home bathroom or spending a fortune at the groomer. Jurassic Pet Wash is a great bargain at only \$10 for a 12-minute bathing session.

The pet wash features a huge, sloping washtub with a nonslip mat and easily fits dogs of all sizes, including older dogs with mobility problems. There are six wash cycles, including oatmeal shampoo, tearless shampoo, flea and tick shampoo, conditioner, pet

...rinse to remove any remaining soap residue.

8. Select "Vacuum" and vacuum excess water off of pet.
9. Select "Dryer" and blow dry for a soft, fluffy coat!
10. Please use "Tub Disinfectant" to clean up when you're done!

It's a tail waggin' good time!

deodorizer, and disinfectant. Plus, pet owners love the groomer-grade blow-dryer and FURminator vacuum that sucks up excess hair and water from pets' coats.

"It has everything you might need and is kept very clean. Also, the water is the perfect warm temperature so that the pups are comfy," says Regan Henrick, a longtime loyal customer.

Another perk of bathing your pooch at Jurassic Pet Wash is that it has all the comforts of home. The pet wash features air-conditioning in the summer and heat during the winter,

a built-in satellite radio and speakers, and a peanut butter treat dispenser that's sure to persuade even the antsiest of pets to cooperate.

"The vacuum that sucks up water on your dog's coat eliminates the need to towel dry them and saves you a ton of time," says Carina Jahn, regular customer and owner of two Shiba Inu dogs. "It was a no-hassle way to wash my dogs, and they seemed pretty relaxed considering they were getting a bath."

When visiting Jurassic Pet Wash, there's a good chance your pup will have the opportunity to get some doggy social time in with Meatball, owner John Borek's 14-year-old rescue pit bull mix, or Sophie, the yellow Labrador mix affectionately known as the resident car wash dog. Meatball can often be found sunbathing on the grassy knoll behind the pet wash, and Sophie is usually chasing pigeons off the car wash grounds or following her dad, Bobby, around as he cleans up the property.

Jurassic Car Wash has fun for the whole family, too. Customers can enjoy a premium car wash while sitting in the presence of moving, growling animatronic dinosaurs. Open 24/7, there are four convenient self-service bays, a full-service automatic wash that leaves your car bone dry and spotless when it exits the tunnel, dino benches for selfies and photo opps, an on-site barbecue truck, and more.
