

Dear Origins Families,

After a long weekend, we welcome you back to a normally scheduled couple of weeks. We look forward to getting back in the rhythm of the week and welcoming this unseasonably warm start to fall. Next week we will begin after school activities with a variety of clubs and homework help for students that run to 4:45, Monday through Thursday. Please keep an eye out for a full schedule of events and parent/student sign up, coming home with your student at the end of this week, and let us know if you have any questions about the various options. We also look forward to seeing you at our 2nd Annual PA Potluck on October 16th. Have a wonderful week.

Mr. Banks

Classroom Feature: Ms. Cavallo

Both Earth Science and Living Environment classes started the year off with a short unit about Chemistry to get them ready for their science work this year. As part of the unit, each student “adopted” an element and became an expert on it. From Sodium to Uranium, students learned how their elements are used, who discovered it, and lots of other interesting facts. For example, did you know that copper is the oldest element known and used by mankind! (Thanks for the cool fact Kerima Amer!!) At the end of the project, students made element cubes that we hung around the classroom to make a dangling periodic table! Now that they have a good foundation, Living Environment is ready to start learning about Cells and Earth Science can start learning about Rocks and Minerals.

Celebrations!!!

At OHS we have a little tradition called Celebrations! It is a way to celebrate our scholars and staff for upholding our school mission and values. It happens each Friday during Morning Meeting.

Students and staff can receive a bracelet for the following categories:
Creativity, Curiosity, Reflection, Empathy and Determination

Due to the short week last week we will be holding all celebrations for this Friday. Stay Tuned!!
