

Clinical preventive dental services provided are for children and adolescents under 20 years old, who are covered by State Insurance: Minnesota Health Care Plans (MHCP) such as MA, South Country Health Alliance, Blue Plus, UCare, or uninsured. If patient is covered by private dental insurance or additional/supplemental health insurance plans, please use other dental offices. If patient has received preventive dental services within the last 6 months, patient is up to date according to dental standards, therefore is not due. Patients participating in our program who are enrolled in a state assistance program will have their services billed to insurance and the unpaid portion will be paid by grant funding. If patient is uninsured, Let's Smile, Inc. utilizes grant/donation funding to cover the cost of their services. Let's Smile, Inc. does not bill families for preventative services.

⚠️ Please do not fill out this form if your child has private dental insurance or an established dental home. ⚠️

*Please check the type of insurance you have and write Member PMI Number # _____

No Insurance MA MN Care South Country Health Alliance U-Care Blue Plus

YES, I give permission for my child to receive clinical preventive dental care services that include: •Basic Screening Surveys (BSS): assess for broken enamel on teeth, detect infections in gum tissues, check for oral cancer, and inspect for the proper development of teeth. Results are documented and communicated to guardian/caregivers/ Collaborative Program Directors (school nurse or social worker) and referring dentist •Dental prophylaxis: removal of oral plaque, calculus, stains, and bacteria that cause cavities and oral infections •Fluoride varnish treatment: strengthens the enamel of teeth to prevent cavities •Sealants: when applied to chewing surfaces of molars, help to prevent cavities •oral hygiene instructions •nutritional counseling regarding oral health •referrals as needed.

I understand that these services are provided by a Collaborative Registered Dental Hygienist and the assessment is not a replacement for a dental exam by a licensed dentist. A dental exam by a dentist is recommended least annually.
