

# SitePREP®

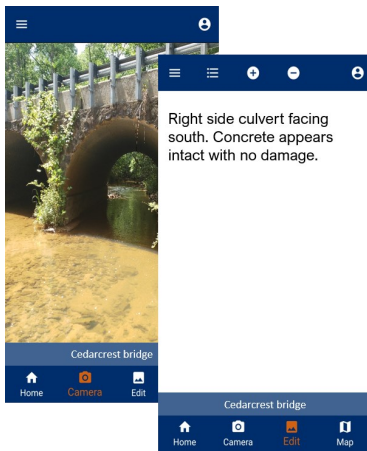

## A simpler approach to mobile data collection and report creation.

Compile and distribute informative, photo-driven reports and maps quickly and easily, from your iOS or Android device with SitePREP®.

### 1—Create

Open the SitePREP app, tap the Projects tab and create a new project. Easy!

### 2—Capture and Edit

Take photos and add notes. Meta data, including image capture direction, time and date is automatically tagged to each photo for reference.

### 3—Compile and Send

Once the survey is complete, generate a report document or geodata file within the app. Then share them via email.

SitePREP saves time and delivers deeper insights through an intuitive all-in-one app.

- **Time savings:** Reduce onsite inspection and report creation time by up to 60%.
- **Accuracy:** No more forgotten details; photos, notes and geolocation are all in sync.
- **Efficiency:** Deliver reports before leaving a jobsite, enabling face to face clarification.
- **Productivity:** Increase the number of sites visited each day by 50% or more.
- **Deep insights:** Build and share .kmz map files with embedded, directional photos.
