

TACKLE WORKFORCE CHALLENGES FOR LONG-TERM CARE

INTEGRATED, CLOUD-BASED TIME AND LABOR

Expertly manage your workforce in long-term care with a solution that supports your business goals, compliance, needs, and variable hour scheduling challenges.

THE RIGHT TOOLS

Attendance on Demand is an integrated cloud-based time and labor management system with real-time absence management, scheduling, and custom reporting features.

A configurable mobile and desktop interface with advanced functionality that helps reduce labor risks, calculate accurate overtime rates, and create direct and indirect care reports so you can focus on providing skilled workers at the right time to ensure the highest quality care for every patient.

GET ALL THE BENEFITS OF A COMPLETE SYSTEM

CHECK ALL THE BOXES

With our time & attendance application, you receive a higher level of functionality. Let us show you the difference.

LOWER ADMINISTRATIVE BURDENS

Automate calculations for overtime, shift premiums, call backs, and transfer hours. Configure day divides at 11 pm and adjust midnight day divides for PBJ. Customize your PTO policy, seniority-based rules, flex-time, floating holidays, and paid time off based on days worked.

IMPROVE ROI

Deliver the highest quality patient care and control overtime costs. Compare and manage your direct versus auxiliary services, budgets versus schedules, budgets versus actuals, and monthly census ratios.

MEET PATIENT NEEDS

Avoid gaps in care with group scheduling and real-time notifications that includes employee call out features for absence management.

REDUCE RISK

Meet organizational, federal, state, and local labor compliance requirements while still accommodating employee leave requests, unexpected absences, and census changes via desktop and mobile interaction.

ENHANCE YOUR RESIDENT-CENTRIC SOLUTION

Manage budgets and employee schedules through reporting on direct and indirect care labor by location, unit, department or position, in hours and dollars. Interactive summaries support dynamic sorting of relevant data to reflect your quality care priorities.

MANAGE SKILLED WORKERS

Track employee certifications and licenses to ensure they meet mandated requirements such as impending expiration dates.

ELEVATE EMPLOYEE EXPERIENCE

Simplify critical absence and labor management tasks through real-time alerts, such as initiating call offs, call back, requesting a shift, and proactively tracking employees approaching overtime or full-time.
