

TIME TERMINAL IS A SECURE, REMOTE TIME CLOCK APPLICATION.

Time Terminal for iPad® is a fast and convenient way to track employee time and labor information. No access to a time clock terminal? No problem. Time Terminal is a remote time clock application that lets you access your company time clock and employee information from your iPad. It is a secure, reliable and very easy-to-use application for capturing employee in and out punches and job transfers.

ALWAYS RELIABLE

Time Terminal captures punches in real-time and connects with Attendance on Demand. If an internet connection becomes unavailable, Time Terminal will continue to operate off-line collecting employee transactions. Punches and transfers will remain stored on the device until an internet connection is re-established.

Time Terminal uses a simple interface for clocking-in, transferring jobs, and reviewing scheduled. Use it on any of these devices.
