

Dandle•LION Cozy Cub™

Wipeable, Reusable Boundary in 2 Sizes

The Cozy Cub:

- Provides containment while allowing full visualization, making it ideal for the ECMO, cardiac or surgical infants
- Allows immediate access to infant in emergencies
- Heavier weight provides extra support for NAS babies
- MRI compatible
- Easily adaptable for use with medical equipment
- Calms babies during transport and under phototherapy lights
- Sizes:
 - L: 48" long, 6 lbs
 - S: 40" long, 3.5 lbs
- Packaged with a cotton cover (Replacement cotton covers and disposable covers available)

The Cozy Cub is a flexible boundary filled with silky micro disks that nestle up to the baby's every nook and cranny to provide support exactly where it is needed. The Cozy Cub can be used alone when more visualization is needed or in conjunction with other positioning aids for additional support. The unique strap at the end keeps the baby fully contained and keeps the boundary in place.

The Cozy Cub is wipeable and reusable and comes in two sizes. The large size is ideal for bigger ECMO and post-surgical patients. Both sizes are ideal for preemies, agitated babies of all sizes, and any baby who just needs a little bit 'more.'

Loop at one end helps caregiver adjust device to fit any size baby
