

***Amida Care Inc., 14 Pennsylvania Plaza,
New York, New York***

BGA worked with this rapidly expanding private non-profit health insurance company, which specializes in the needs of high-risk members. Their phenomenal growth resulted in the need to consolidate their tenancy previously located on (8) floors to a new build-out with expansion capabilities on (2) large full floors of 14 Pennsylvania Plaza. Project requirements entailed:

- Review Tenant's current occupancy and develop a Program (Facilities Requirements) Report, including projected growth by department, to double the firm's size to 375 people
- Design of 60,000 SF offices to accommodate the need for Reception, Executive Suite, Offices + Staff Workstations, Meeting Rooms, Pantries and Storage
- Design of the Ground-Floor walk-in Enrollment Center for new Members
- Coordination of the Structural Engineering of (2) movable wall systems to create a large Meeting Center from (3) Conference Rooms, as well as (2) interior stairs connecting the (3) levels
