

## *August Accessories Showroom, New York, NY*

BGA enjoys a longstanding relationship with this California-based designer of men's and women's fashion accessories. When August Accessories relocated their showroom within its Fifth Avenue Garment Center building, BGA was challenged with accommodating the (4) individual showrooms and the Design Studio into a considerably smaller space with lower ceilings, while maintaining the look and feel of the prior showroom. Elements of the project included the following:

- Design of (4) individual showrooms within a 1,500 SF space, employing sleek, clean lines, while retaining the design motif of the original showroom
- Within the remaining 1,000 SF of space, create a Design Studio to house the firm's (3) Designers and their reference materials
- Maximize the illusion of space and height by exposing the ceiling slab, coupled with track lighting for the displays
- Design of display Millwork to showcase the firm's unique collection of designer hats and its vast array of accessories for handheld electronic devices
- Selection of furnishings to complement the setting and reinforce the welcoming and professional atmosphere for the store buyers
