

Business Wire—Office + Newsroom

Business Wire secured (2) full floors of midtown NYC space to house their NYC Newsroom and Data Center, as part of an Office Expansion. The Newsroom is the heart of this 24-hour On-Line Business News service. Project features include:

- Angled walls interrupted by vertical doors and frames at the perimeter office
- Office entrances are highlighted through the use of maple doors, frames and 'Welcome' mats set into the carpet
- The Newsroom desks are arranged amphitheater-style around the 'Stage' where incoming news items arrive
- The 'State of the Art' Data Center includes raised floor, UPS and a FM200 Fire Suppression system
- A dramatically backlit, oversized Business Wire logo greets visitors to the Main Reception floor in the Elevator Lobby
