

Dennis' Natural Mini-Meals, New York, NY

BGA completely transformed the look and feel of a former music store into a dramatic and inviting restaurant space, where healthy, all natural, preservative-free foods are served. Our design solutions for this Flatiron district, 3,000 SF loft space include:

- Overhead canopies of forest green canvas, stretched over custom-designed, pre-fabricated metal frames. The canopies are bolted to the walls and columns, and give the restaurant patrons a sense of scale, while separating the seating areas and filling the volume of the loft space.
- Use of oversize, pendant paper lanterns which contrast against the dark, overhead canopies, provide sculptural elements and supplement the accent lighting
- Full Kitchen and Food Prep counter design to accommodate stoves, grills, yogurt machines, juicers, popcorn machines as well as dishwashing and refrigeration equipment
- Custom designed Overhead Menu Board at the Point of Sale reinforces the metal canopy design
- Walk-up window storefront and separate take-out counter design at the front of the restaurant
- Dramatic use of wainscot tile in conjunction with the dark quarry tile floor, ensures durable, easy-to-clean surfaces and reinforces the natural foods color scheme
