

Weill Cornell Medical College – Lecture Hall

The NYC campus of Weill Cornell Medical College is a long term client of the firm. Our architectural projects include renovations to the educational + research facility. This project focused on the creation of a fully-integrated Lecture Hall within the main campus building. Project features include:

- Auditorium-Style room designed to hold 140 people on a pitched floor, including provisions for ADA access
- Integrated the Audio-Visual system requirements for a recessed Projection Screen, Projector, Podium, Speakers and White Boards
- Sound Insulation in the walls, and sound-absorbing panels on the walls to maximize the acoustics
- A variety of Lighting Controls + Settings, based on input by the Lighting Designer
- Selection of finishes including wood, fabric and wallcoverings
