

## *Intercontinental Exchange (ICE) 2 World Financial Center, New York, NY*

This Atlanta-based securities firm sought to establish a presence in New York's Financial District. The 9,000 S.F. facility selected for their NYC Sales, Trading & Demonstration operation was a former retail space in the World Financial Center. The space featured generous ceiling heights and compelling views of New York Harbor.

BGA was retained as Executive Architects to produce the Contract Documents based on the Schematic + Design Development work by ICE's Atlanta design firm. Aspects of the project included:

- Analysis of the Equipment requirements and the coordination of the Data Center layout, systems and redundancy with the Mechanical Engineers
- Integration of the various direct, indirect and sculptural lighting fixtures selected, which provided both overall and task lighting to the high-ceiling spaces
- Detailing of the custom wood and glass wall systems which separate the Reception, Trading Room, Boardroom and Demonstration Room spaces
- Coordination of the Audio-Visual systems in the Boardroom and Demonstration Rooms.
